PROTECTION
AS YOU NEED

SDE HYDROPHOBIC GROUT

ADHESION AND PROTECTION AS YOU NEED

SDE HYDROPHOBIC GROUT

Advanced redispersible semiflexible polymer powder for drymix mortar applications obtained through spray-drying of optimized latex dispersions.

SDE Hydrophobic Grout cost-effectively improves the key properties of cement based formulations, such as adhesion and hydrophobicity. This new product is suitable for joint fillers and 1K (one component) waterproofing mortars for building and construction applications.

Waterproofing mortar made with SDE Hydrophobic Grout can be used over concrete, ceramic and concrete blocks, cement and other cementitious bases in the following fields of application: wet and wettable areas; buried structures such as tanks and pools; internal and external walls; and underground foundations and baseboards.

A 1K drymix mortar with SDE Hydrophobic Grout offers the market a combination of performance, handling and sustainability-related benefits that set it apart from standard 2K systems based on dry mortar and liquid dispersion.

Key features and advantages

- Environmentally advanced technology (“Low-emissions” concept)
- Provide excellent adhesion on various substrates such as concrete, ceramic, cement and cementitious bases
- Ensure resistance to water and pressing water
- Excellent adhesion and cohesion properties with gypsum
- Fast & practical use: needs only water

Benefits

- 1K drymix mortars offer enhanced performance over 2K and other polymer alternatives
- Easier application, reliable handling and less environmental impact
- Prevents and definitely eliminates moisture and infiltration
- Suitable for the use in drinking water reservoirs
